

GLOBAL STRATEGY

The fund invests in a responsible and sustainable manner in European small and mid-sized companies. Over a period of at least five years, it aims to increase the value of invested capital and to outperform the main European euro-denominated small and mid-cap indexes. The fund is at least 92% invested in equities from countries that are member states of the Council of Europe.

MONTHLY MANAGEMENT COMMENTS

As of May 31, our equity investment rate reached 98 %, with nearly 50 % of our portfolio consisting of companies with a positive impact. May continued the rebound that began in April, driven by early signs of easing in trade negotiations. As a result, the fund gained over 5 % during the month. We took advantage of this momentum to sell our remaining positions in Borregard and Stora Enso, and we reduced our exposure in the healthcare sector, particularly in Recordati and Sonova. On the other hand, we increased our investments in Arcadis, Munters, Sopra Steria, and VAT.

SYNTHETIC RISK INDICATOR (SRI)

Risk Scale from 1 (lowest risk) to 7 (highest risk), category 1 does not mean the investment is risk free. The risk category of this Fund is not guaranteed and may change over time. The risk level derives from the exposure of the sub-fund to equity markets.

MAIN RISK FACTORS

EQUITY MARKETS, CAPITAL LOSS, CURRENCY, NON FINANCIAL, LIQUIDITY

The SICAV's investments on ESG criteria may lead to deliberate restrictions being applied to the potential investment universe. The application of these non-financial criteria may result in foregoing investment opportunities, underweighting certain holdings or concentrating the portfolio. In addition, the adoption of ESG criteria, while it supports long-term sustainability, could reduce returns in the short term if the SICAV is obliged to dispose of a holding on the basis of non financial changes despite its financial performance.

EXCLUSIONS

Companies generating 5% or more of revenue in the following sectors: Weapons, non-conventional weapons, coal, adult entertainment, tobacco, oil sands, gambling, nuclear energy, GMO, shale oil and gas, pipelines for non-conventional oil or gas; Companies involved in major ESG controversies, such as serious and irreversible environmental damage, human rights violations, corruption, etc.

POSITIVE IMPACT

Companies whose products and services contribute to sustainable development, such as renewable energy, smart transportation, sustainable water management, the circular economy, healthcare, sustainable construction, etc.

The «Clartan Ethos ESG Europe Small & Mid Cap» fund was awarded the *Investissement Socialement Responsable* (ISR) label on 3rd October 2023. This label was created in 2016 by the French government to distinguish funds that apply a robust socially responsible investment (SRI) methodology, leading to concrete and measurable results. The *ISR* label is awarded for a renewable period of three years.

Among the indicators monitored in the sustainability report, the four E (Environment), S (Social), G (Governance) and HR (Human Rights) indicators selected for ISR certification are :

- E : breakdown of companies with targets or commitments in line with the «Science-based Target» initiative, by number of companies
- S : average gender pay gap within companies
- G : gender diversity on the board of directors
- HR : number of companies without a human rights policy.

The indicators are published monthly.

*The implementation of Ethos's socially responsible investment principles reduces the initial investment universe by at least 30% and defines the responsible investment universe in which the securities are selected by the fund managers. The table compares the fund's performance to that of the initial universe on the 4 indicators chosen for the ISR label (better / worse).
